

WHATEVER THE PEST, ARILON HAS YOUR BACK.

syngenta®

ARILON is the non-repellent insecticide to always have on hand. On top of being extremely effective, it's one of the most versatile solutions on the market – use it against ants, cockroaches, houseflies and termites; indoors or outdoors; and on different surfaces. Partner with ADVION baits to pack a punch.

THE BENEFITS

Versatile enough to meet your needs

- ▶ ARILON controls a wide variety of ants, cockroaches, houseflies and termites
- ▶ Can be used indoors, outdoors and on a wide range of common surfaces
- ▶ Suitable for commercial and domestic use
- ▶ HACCP certified

An effective solution that gets the entire colony

- ▶ Superior transfer into the nest for long-lasting control
- ▶ Non-repellent, fast-acting solution means pests are rapidly dealt with
- ▶ Partner with ADVION gel baits for even better results

Convenient and easy to use

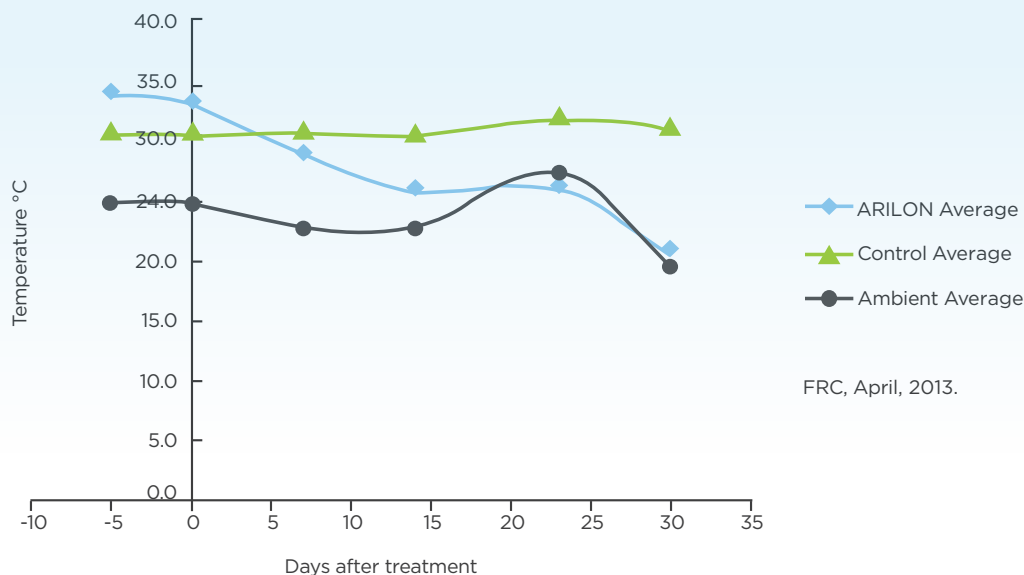

- ▶ No odour or staining
- ▶ Water Dispersible Granule formulation makes it easy to use
- ▶ Suitable for pyrethroid resistant management programs

THE SCIENCE

WHAT MAKES ARILON SO EFFECTIVE AGAINST PESTS?

ARILON's powerful activity, combined with its non-repellent properties, offers effective control against a wide range of pests. The chart below from a recent study shows how a termite's nest temperature rapidly drops after applying ARILON, signifying colony collapse.

Direct treatment of *Coptotermes* nests in trees

TIPS FOR USE

- ▶ Partner ARILON Insecticide with ADVION gels in situations where superior cockroach or ant control is needed, such as in commercial kitchens, warehouses and areas with persistent infestations
- ▶ Applying ADVION over the top of ARILON not only improves uptake of the active ingredient; it also speeds up control and delivers a broader, longer-lasting treatment zone compared to using ARILON alone. This pairing can also deliver results in jobs that have previously been resistant to other treatments

Please refer to the label for more detailed information about how to use ARILON Insecticide
