

Big Smoke

Big Smoke Insecticide Smoke Generator is a unique and effective way of treating insects in hard to reach places, cracks and crevices, behind and under furniture too heavy to move as well as for a quick clear out in areas with heavy pest infestations.

Big Smoke provides excellent control in a range of situations

including homes, warehouses, animal housing, restaurants, hospitals and hotel rooms against a wide range of pests including:

**Ants, Flies,
Fleas, Silver-
fish, American and
German Cockroaches,
Weevils, Spiders,
Caterpillars and
Aphids**

OPP- 300g/kg OTHRO-PHENYLPHENOL

As the disinfectant smoke disperses the active ingredient comes into contact with all surfaces in the room treating both surfaces and the air.

- Provides disinfection of surfaces in homes, hospitals, offices, hotels and restaurants
- Reduces airborne and hidden contaminants, preventing re-contamination
- Reduces disinfecting handling costs
- Quick, easy to use application
- Pre-dosed tins with uniform dispersion
- Safe for operators with limited exposure
- Great for disinfecting Silos and grain & feed storage areas

GARLIC- 20g/kg GARLIC OIL

Big Smoke Garlic Natural Fertiliser Smoke Generator is a natural smoke containing garlic oil, which is a known plant nutrient. Garlic oil stimulates the plants' natural processes to produce a balanced healthy growth, helping the plant to resist disease and insect attack.

- Perfect for use in greenhouses
- Organic solution – no conventional pesticides included
- No need to remove plants from greenhouse
- Builds plants natural resistance to insect attack
- Stimulates plant growth and immunity
- Simple and ready-to-use fumigation device
- Smoke distributes evenly and accesses all areas of the greenhouse storage areas
