Service Temperature	-40 – 150°C
VOC Content	<50 g/L
Indicative data only, not intended for preparation of specifications	

Surface Preparation

Surfaces must be clean, dry, and free of dirt, grease, oil or water. Clean surface with turps and allow to completely dry.

Directions for Use

1. Cut nozzle at 45° angle, cut cartridge tip and fit nozzle.
2. Place in caulking gun, and apply with steady pressure, ensuring sealant is pushed into the joint.
3. Tool with a spatula dipped in detergent water within 5-10 minutes of application.
4. Clean up with turps before product skins.
5. Sealant will cure in 72 hours

Tips

- For neater joints, mask sides before applying sealant and remove tape before sealant skins.
- Sealant must be cleaned regularly to avoid build-up of soap scum.

Clean Up

Uncured product may be removed with mineral turpentine. Cured product can be removed with Selleys Silicone Remover or by cutting and scraping.

Storage

Store in a dry place, below 30°C. Use within 6 months of opening.

Selleys Wet Area Matt Silicone

Limitations

- Not paintable. Complete painting 7 days prior to applying sealant
- Not suitable for use on PP, PE, PTFE
- Not suitable for aquariums
- Not suitable for food or drinking water contact
- Not suitable for permanent water immersion
