

## PRODUCT INFORMATION

# Seasol

## The Seaweed Solution

**Seasol** is a liquid seaweed complete garden health treatment that contains plant nutrients, trace elements, alginic acid and other bioactive compounds.

### INSTRUCTIONS FOR USE

**Seasol** is a fast-acting liquid that goes to work immediately whether applied to the soil or foliage. Regular applications, every 2 to 4 weeks, will give the best results. Being completely natural, it's safe on all plants including Aussie natives.

**Seasol** is available as a concentrate or hose-pack.

#### APPLICATION DIRECTIONS

##### Concentrate

To use the concentrate generally mix 40mL of **Seasol** concentrate per 9 litres of water (standard watering can) or use the application rate table below. Each 9 litre watering can treats up to 2 to 4 square metres of garden or lawn.

##### Hose-On

Simply shake the container, push the plastic straw included in the pack firmly into the underside of the spray nozzle. Attach to the hose, turn on the tap, lift the yellow tab and spray onto the garden. Each 2 litre hose-on treats up to 100 square metres of garden in around 10 minutes.

To refill the 2 litre container, add 500mL of **Seasol** concentrate and 1.5 litres of water. For an extra boost in the growing season add in 500mL of **PowerFeed** concentrate and top up with 1 litre of water.

PLANT/APPLICATION TYPE	RATE/9L	APPLICATION FREQUENCY

**Promotes overall plant health, enhances flowering and fruiting**

**Stimulates strong root growth and beneficial soil microbes**

**Helps plants cope with heat, drought, frost and resist diseases and pests**

**Improves seed germination and reduces transplant shock**

### USAGE TIPS

**Seasol** is the perfect partner for any gardening project, applied regularly throughout the year.

- ✓ In winter apply in the morning to the soil after the frost has cleared, this gives the plant time to dry before nightfall.
- ✓ In summer apply early morning or early evening before the heat of the day.
- ✓ Before planting soak the seedling tray or pot plant in a bucket of **Seasol** to aid plant establishment.
- ✓ Soak seeds in **Seasol** before sowing, for improved germination.
- ✓ Apply **Seasol** and **PowerFeed** together in the same watering can. **Seasol** helps to increase nutrient uptake, so when **PowerFeed** is applied it is much more effective.
- ✓ Due to the natural ingredients in the product avoid contact with porous surfaces. If contact is made, please wash off immediately with water.
