

PRODUCT INFORMATION

PowerFeed

ALL PURPOSE including Natives

PowerFeed is a dynamic fertiliser and soil conditioner with a unique formula that combines the benefits of nutrients and trace elements, fish, amino acids and natural soil conditioners.

INSTRUCTIONS FOR USE

PowerFeed is a fast-acting liquid that goes to work immediately whether applied to the soil or foliage. Regular applications, every 2 to 4 weeks, will give the best results. Being low in phosphorous it is safe on all plants including Aussie natives.

PowerFeed is available as a concentrate or hose-pack.

APPLICATION DIRECTIONS

Concentrate

To use the concentrate generally mix 50mL of **PowerFeed** concentrate per 9 litres of water (standard watering can) or use the application rate table below. Each 9 litre watering can treats up to 2 to 4 square metres of garden or lawn.

Hose-On

Simply shake the container, push the plastic straw included in the pack firmly into the underside of the spray nozzle. Attach to the hose, turn on the tap, lift the yellow tab and spray onto the garden. Each 2 litre hose-on treats up to 100 square metres of garden in around 10 minutes.

To refill the 2 litre container, add 500mL of **PowerFeed** concentrate and top up with 1.5 litres of water. For a total feed and health treatment add in 500mL of **Seasol** concentrate and top up with 1 litre of water.

PLANT/APPLICATION TYPE	RATE/9L	APPLICATION FREQUENCY
Ferns	10mL	Every 1-2 weeks
Indoor Plants & Foliar Application	20mL	Every 1-2 weeks
New Planting	30mL	At planting & again 2 weeks later
Established Garden	50mL	Every week
Established plants and trees	90mL	Every 1-2 weeks
Lawns	90mL	Every 2-4 weeks to maintain

TYPICAL ANALYSIS

W/V: Nitrogen (N) 12.0%. Phosphorus (P) 1.4%. Potassium (K) 7.0%

Boosts strong plant growth and vigor

Promotes flowering and fruiting for beautiful blooms and tasty edible produce

Improves the soil structure to help break down clay and reduce nutrient losses in sandy soils

Stimulates soil microbial activity and increases the availability of nutrients

USAGE TIPS

PowerFeed takes care of the whole garden above and below the ground with regular applications throughout the growing season.

- ✓ In winter apply to the soil in the morning so that the plant dries before nightfall to help prevent fungal attack. Apply to winter vegies flowering annuals, plants and natives.
- ✓ In summer apply early morning or late in the day when it is cooler to avoid foliage burn. Do not apply on days that may exceed 25°C.
- ✓ **PowerFeed** is safe to use on all edible produce. Ensure all produce is washed thoroughly before eating.
- ✓ Apply **PowerFeed** and **Seasol** together in the same watering can. **Seasol** helps to increase nutrient uptake, so when **PowerFeed** is applied it is much more effective.
- ✓ Due to the natural ingredients in the product avoid contact with porous surfaces. If contact is made, please wash off immediately with water.
